

# Bone Deer & Zero

Look through the pages and become acquainted with the various pieces. Read the instructions and study the illustrations to know what/where to cut/fold. Before gluing, always dry-fit the pieces to ensure that they fit properly.

When assembling the model and following the instructions, do not take the illustrations too literally. In many cases, pieces will be simplified. Other times, pieces (or entire sections) may be missing that were once

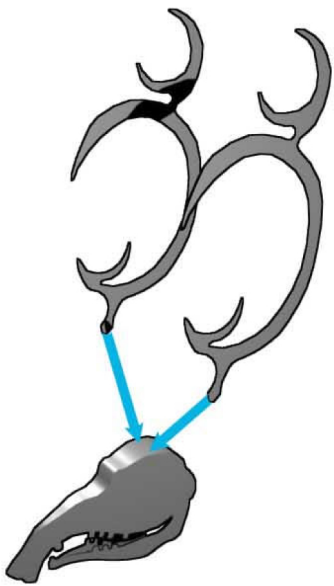

1. Glue the tab on piece 1A to piece 1B.
2. Cut three slits along the lines on piece 1E, then glue between pieces 1A&B.
3. Glue the tab on piece 1C to piece 1D.
4. Glue piece 1F between pieces 1C&D.
5. Glue the jaw to the white dots on the sides of the skull. Before the glue dries, you can position the jaw however you like.
6. Glue pieces 2A-F to create three pairs of antlers.

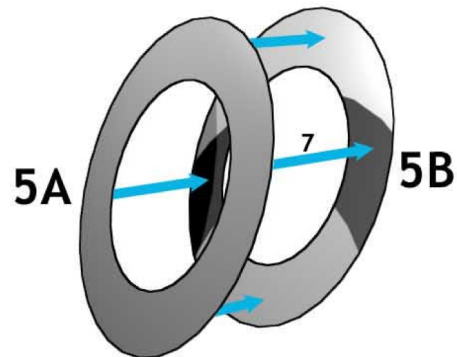

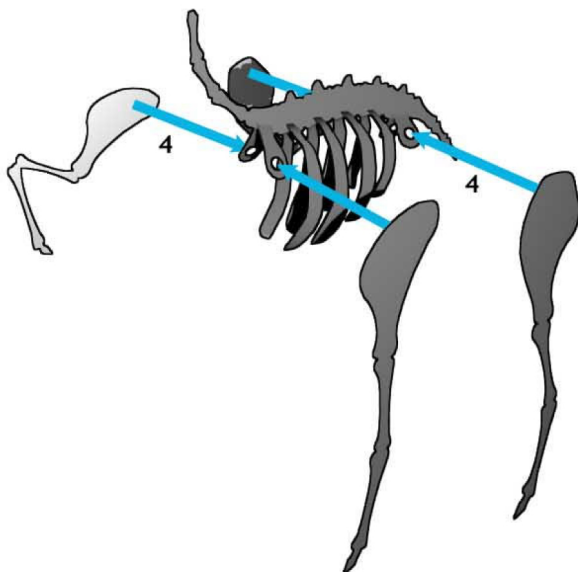

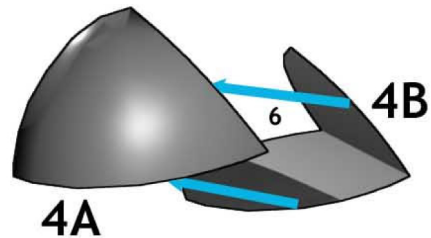

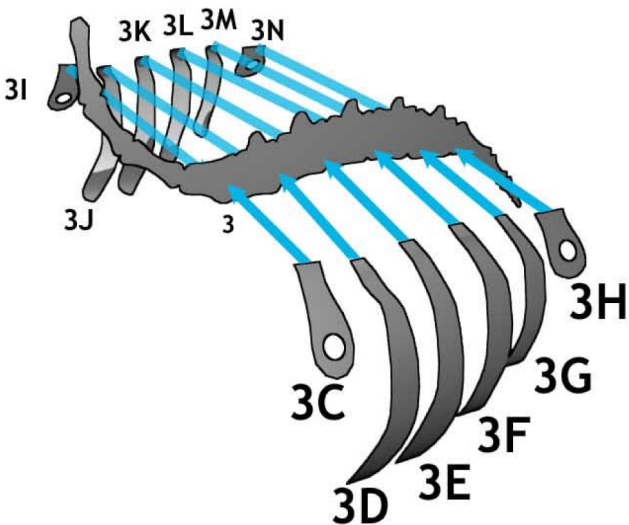

-1-

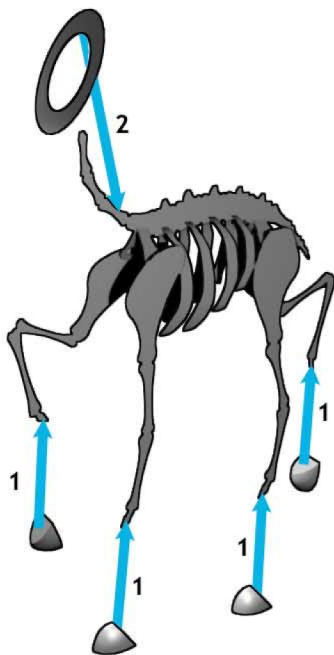

(c) Disney

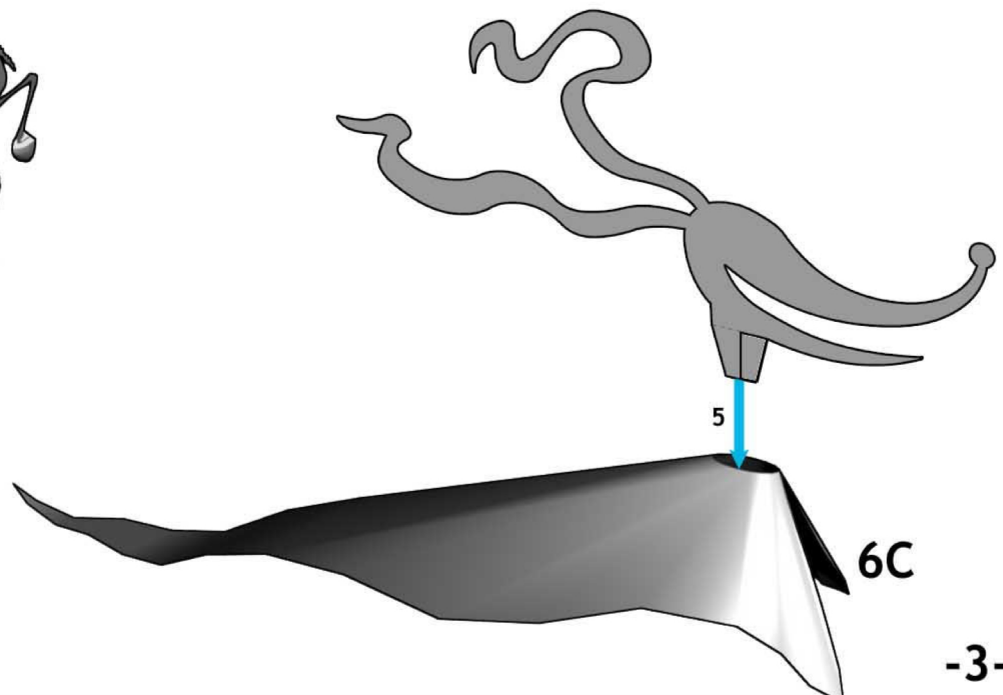

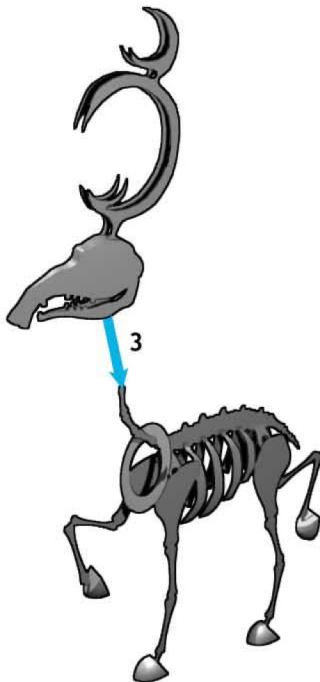

1. Insert and glue the sets of antlers to the slits on the top of the skulls.
2. Glue pieces 3A to pieces 3B to create three sets of spines. When dry, cut six slits along the black lines on each spine.
3. Insert pieces 3C-H into the six slits on the spine as shown. Glue pieces 3I-N to the tabs of pieces 3C-H. Glue the ribs into place with little daubs of glue on the underside. When dry and secure, gently bend the ribs to form the rib cage.
4. Pick and choose the front and back legs that you want to use for each bone deer. Fold and glue the legs to themselves, then glue the white dots on each leg to the white dots on pieces 3C,H,I,N. Before the glue dries, you can position the legs however you like.
5. Assemble pieces 4A, gluing the 'V' wedge together.
6. Cut a slit along the white line on pieces 4B, then glue them to pieces 4A.
7. Glue pieces 5A to pieces 5B. When dry, cut a slit along the white lines. If you plan on attaching the bone deer to the coffin sleigh, poke a hole through the back where the crosshairs are.

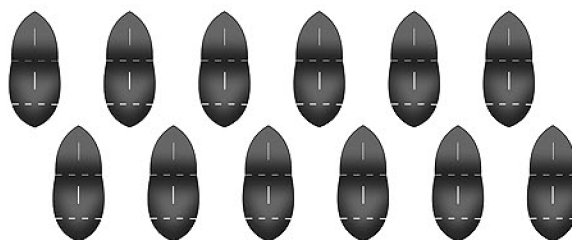

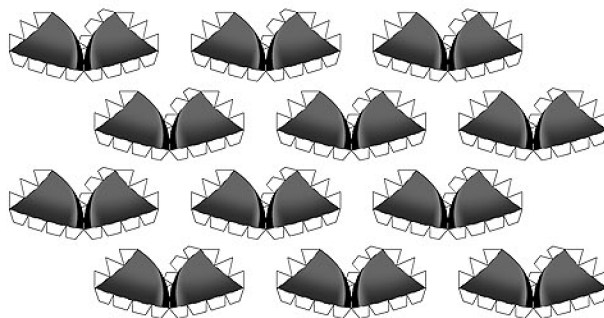

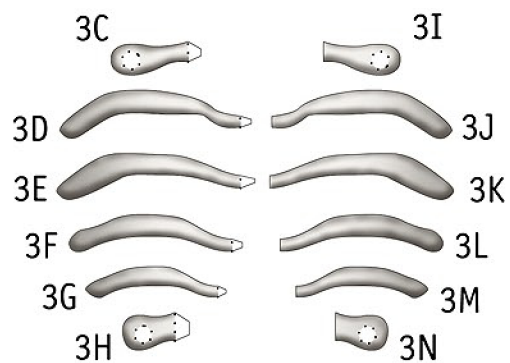

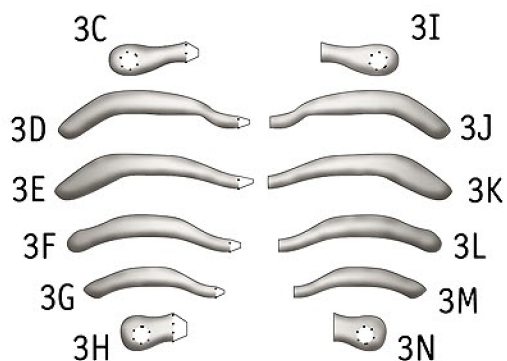

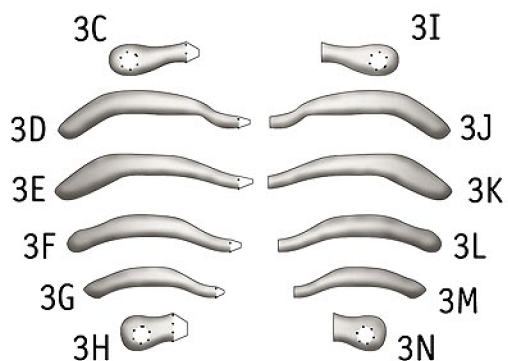

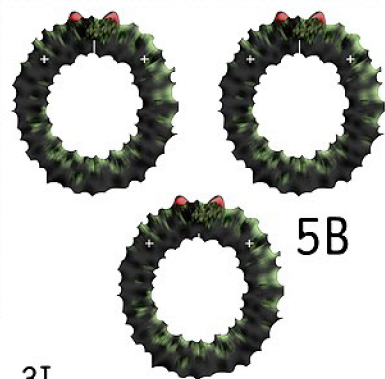

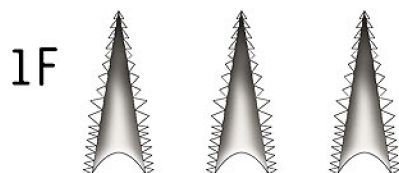

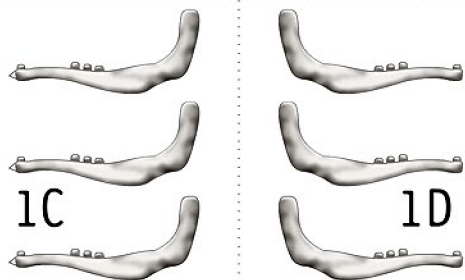

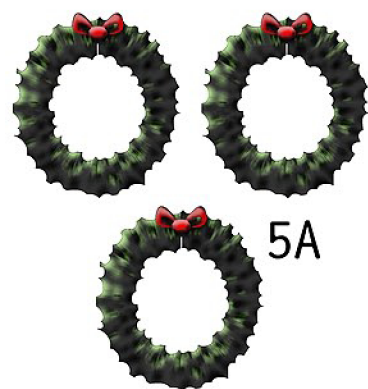

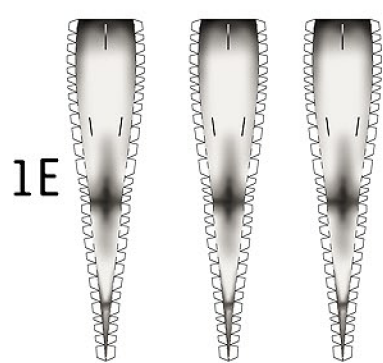

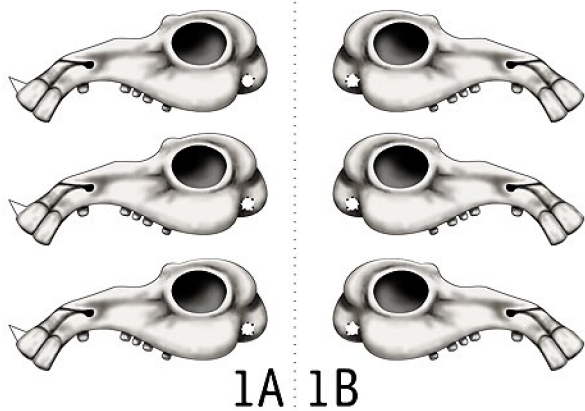

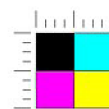

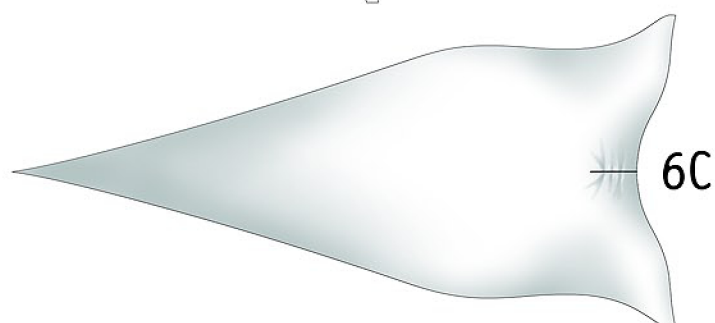

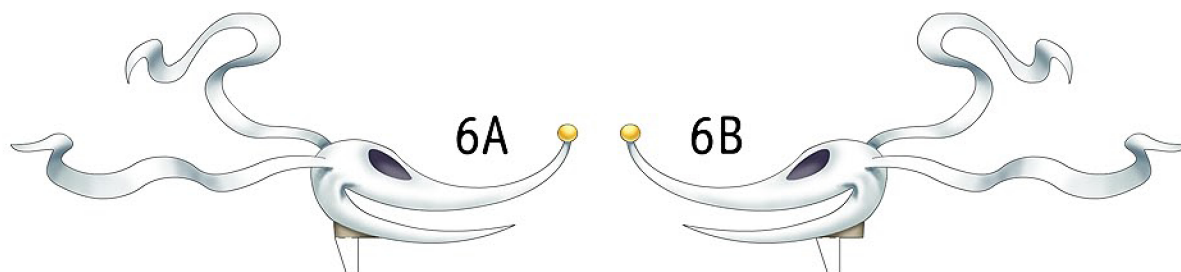

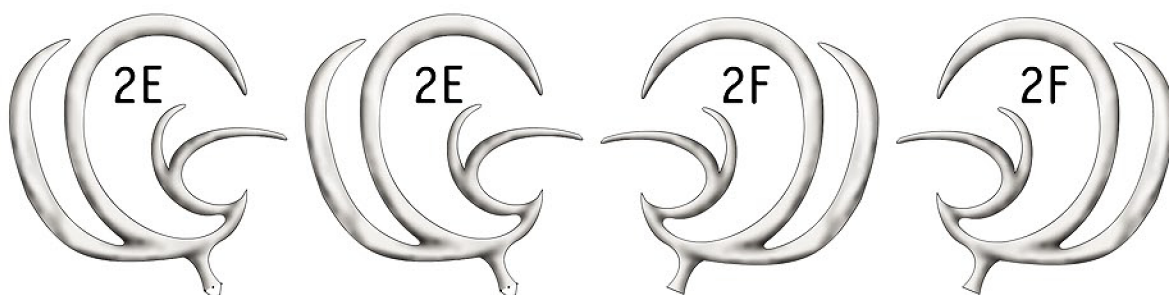

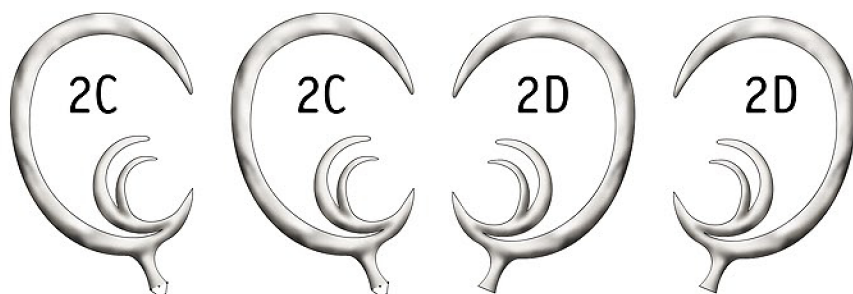

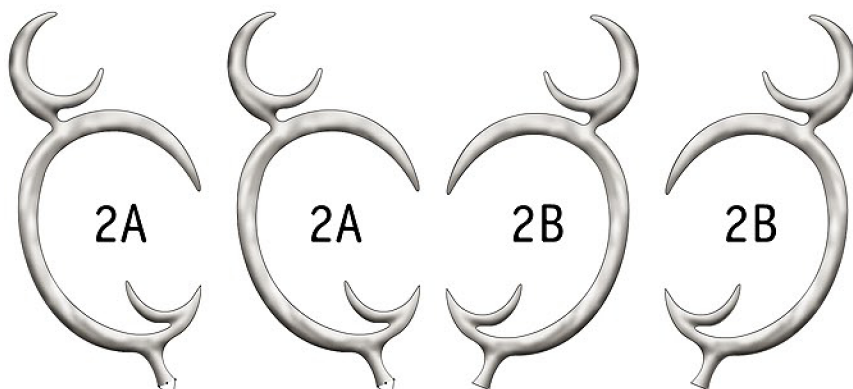

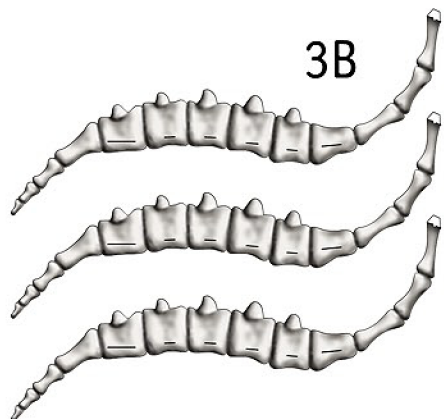

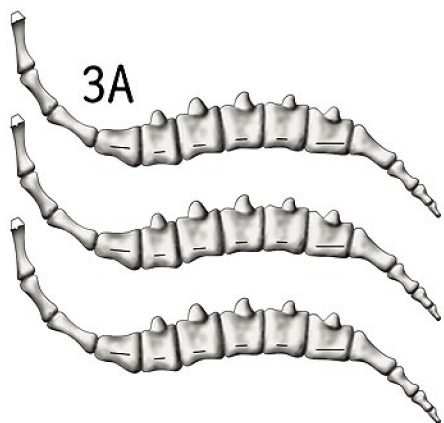

1. Glue the hooves to the ends of the legs.
2. Glue the wreaths around the necks. The necks should slide into the slits on the wreaths.
3. Insert and glue the neck into the bottom slit on the skull. before the glue dries, you can position the head however you like.
4. Glue piece 6A to piece 6B.
5. Cut a slit along the line on piece 6C. Insert the tabs of the head through the slit. Fold and glue the tabs to the underside of piece 6C.
6. Gently bend and curl Zero's body and ears whowever you like.
7. If you plan to attach the bone deer to the coffin sleigh, use black string to connect them all. Run the string through the wreaths and attach the ends to the coffin's front handle.
8. Use white string for the reins. Connect the reins to the wreath on the last bone deer. The completed model is not intended to stand on its own, so it is recommended that you hang it.
