

FORGET-ME-NOT FLOWERS

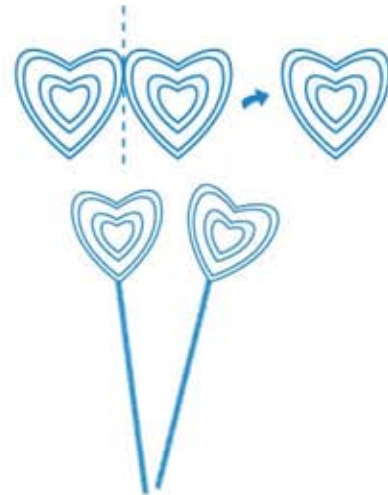

Materials:
Printer
Cutting Tools
Coffee Filters
Pipe Cleaners
Food Coloring

Note: Cutting intended for adults only.

1. First, print on sturdy paper or card stock and set aside to dry. Next, cut out pairs making sure not to cut each pair apart.

2. Fold each pair and place a pipe cleaner between the fold then glue shut. Put aside to dry.

3. Here is the fun part! Take a coffee filter and wet it down. Then you can drop various colors of food coloring to make a colorful pattern. Make as many as you would like flowers. Set aside to dry.

4. Now you can fold your coffee filter and wrap a pipe cleaner around the bottom point to create a flower. Add the flower and elements to a vase or glass and you have a centerpiece for your table.
