## MATERIALS

- 1 or more sheets of 8.5" x 11" heavyweight paper
- Ribbon, yarn, string or tape
- Scissors or cutting tool
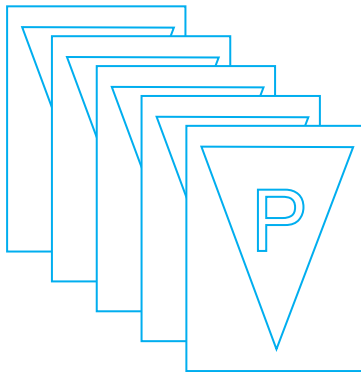

## INSTRUCTIONS   NOTE: Cutting intended for grown-ups only.

1 Decide what you want your banner to say and edit the text in the project artwork. Click on the existing letter, delete, and type in your own letter.
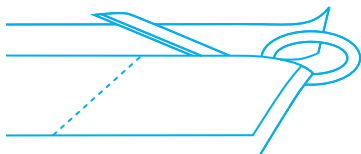

**2** Print your banners and allow to dry completely.

3 Continue this process until you've printed all of the letters of your banner.

4 Using scissors or a cutting tool and cutting mat, trim away the white areas around the artwork.

5 Punch holes on the side of each letter and string together with ribbon or yarn.

6 You can display your banner in a variety of ways, such as hanging them on a line and using clothespins to suspend each letter, or attaching them to a wall or mantel with tape.
