## Toy Story Teeter Toys Template

Cutting is intended for grown-ups only.

Kids will love making their favorite Toy Story characters into teetering, no-topple toys! Preschoolers can design an army of green aliens or a crew of Sunnyside playmates.

### You'll Need:

Plastic Easter Eggs  
Play Dough or Clay  
Self-Adhesive Craft Foam in assorted colors  
Templates  
Scissors  
Markers

### Instructions:

- 1) Have kids roll a small ball of play dough, or clay, and place this in the wide half of a plastic egg. Press clay down, molding it to the shape of the egg. Close your egg and test it. It should stand on it's own, and teeter when poked. If it does not, re-adjust the clay inside the egg.
- 2) Print templates and use the provided shapes to cut the faces and features of the Toy Story characters from self-adhesive craft foam.
- 3) Use markers and small scraps of craft foam to add eyebrows, pupils, and other details to your teeter toys.
