

THE NAME GAME

After listening to the first chapter from *The Son of Neptune*, listen to it once more, making a list below of the number of times you hear the word Percy.

Got them all? Hope you do, because now you need to find all of their names in the word search below. Names can be horizontal, vertical, backward, and forward.

As an added challenge, we've added in a set of secret key names/places/objects from the first chapter (five in all) here. Can you find them?
