

Print out the fish graphic on regular printer paper and cut out the pattern. Don't use paper that is too thick; it will be hard to fold.

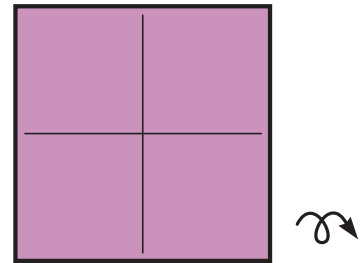

Use the dotted lines on the graphic and the instructions to help guide you with the folds.

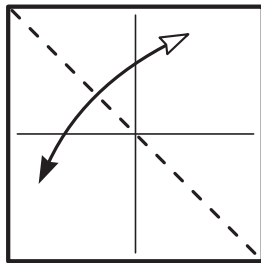

1. Start with the graphic side up, so that the fish face is horizontal. Fold in half horizontally and unfold.

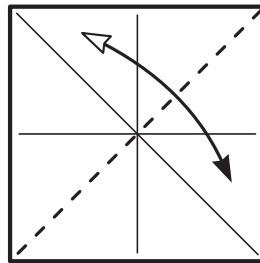

2. Fold in half vertically and unfold.

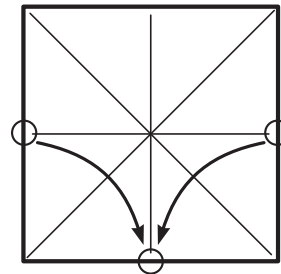

3. Grab the left corner and turn the paper over.

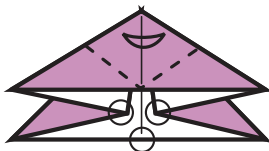

4. Fold in half diagonally and unfold.

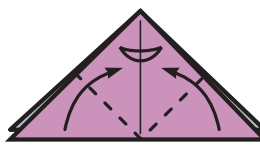

5. Fold in half diagonally and unfold.

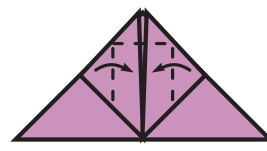

6. Collapse the paper by using the folds created in steps 1-5. The circled points all have to meet.

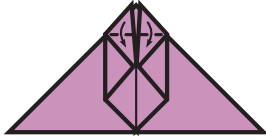

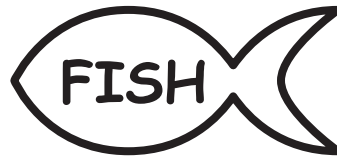

7. Collapse in progress.

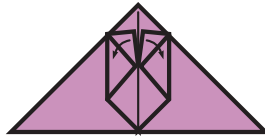

8. Fold the right and left top layer corners upwards to meet at the top corner.

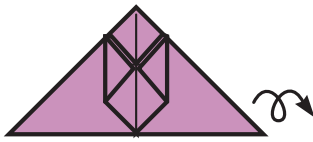

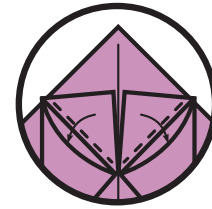

9. Fold the right and left top layer corners inwards so that they meet in the middle.

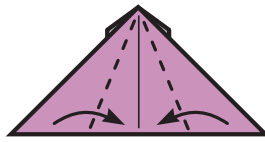

10. Fold the top two triangles downwards half way.

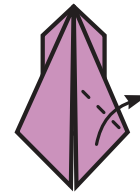

11. Fold the triangles into the pockets. See the close up for more details.

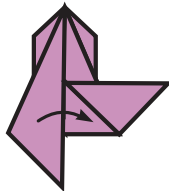

12. Turn it over.

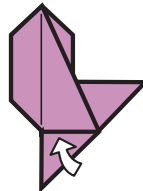

13. Fold the left and right corners towards the middle.

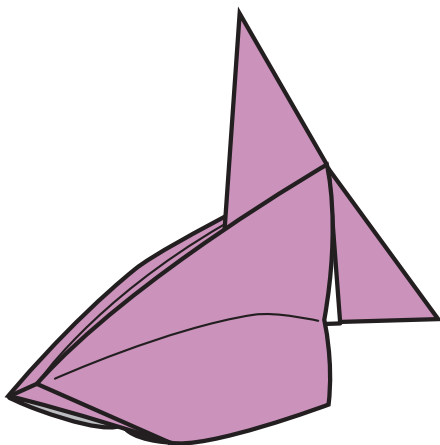

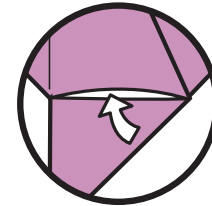

14. Fold the right upper layer outward, as shown.

15. Fold the left upper layer towards the right side.

16. Blow air into the opening. See the close up for more details.

Your fish is finished!
