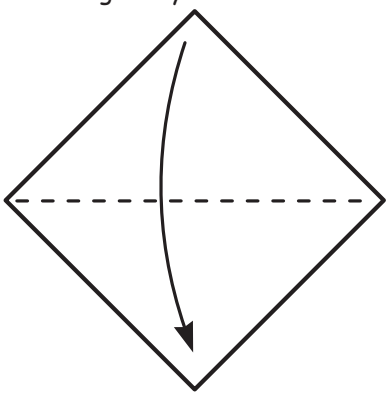
TURTLE

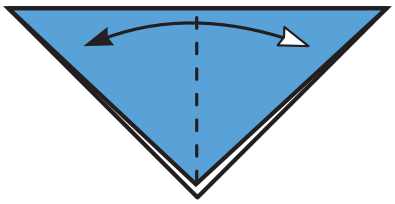
Print out the turtle graphic on regular printer paper and cut out the pattern. Don't use paper that is too thick; it will be hard to fold.

Use the dotted lines on the graphic and the instructions to help guide you with the folds.

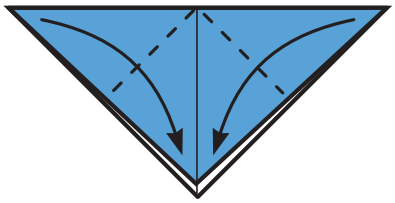


1. The graphic side should be facing down. Fold the turtle pattern in half (as shown) so that the fold runs along the dotted line on the graphic side.

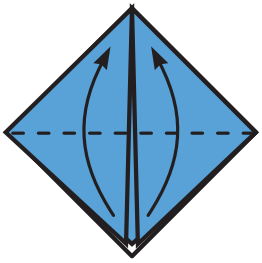
★ **This pattern requires scissors, please ask your parent for help.**



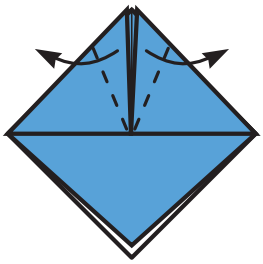
2. The side of the triangle that does not display the turtle's eyes should be facing you. Fold in half (along the dotted line in the above image) and unfold.



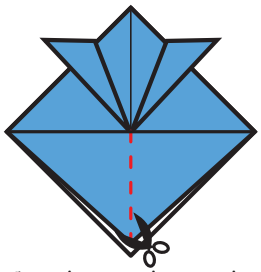
3. Using the dotted lines on the graphic as a guide, fold the left and right corners to the center.



4. Fold the right and left top layer corners upwards to meet at the top corner.

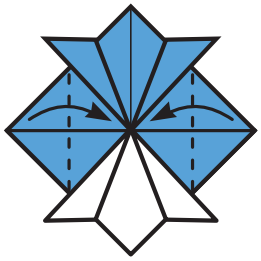


5. Fold the left and right corners on the top layer (as shown) outwards.



6. Cut the top layer along the red dotted lines.

7. Fold the bottom right and left corners outwards like in step 5.



8. Fold the outer right and left corners inwards so that they meet in the middle.

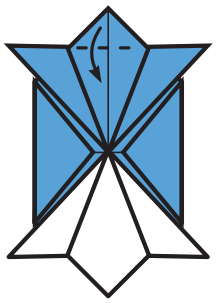
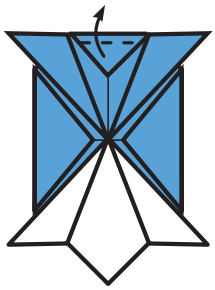
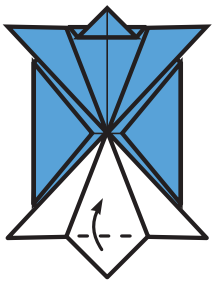
TURTLE



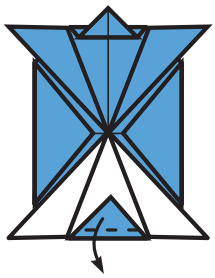
9. Fold down the top triangle to create the head.



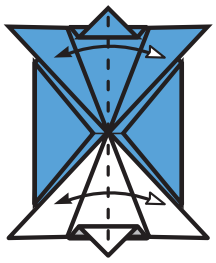
10. Fold the turtle's head upward.



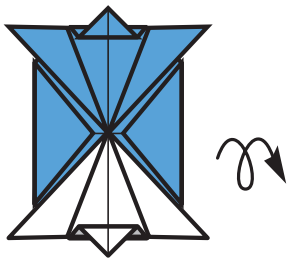
11. Fold the bottom triangle to create the tail.



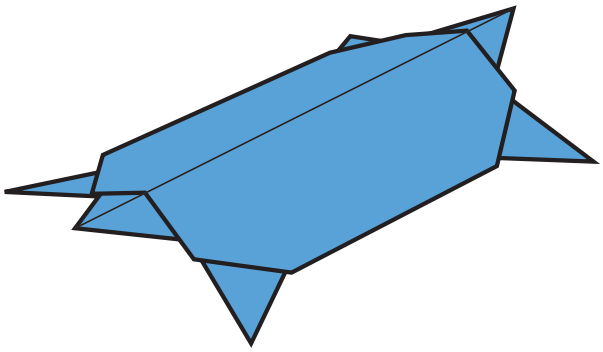
12. Fold the tail down.

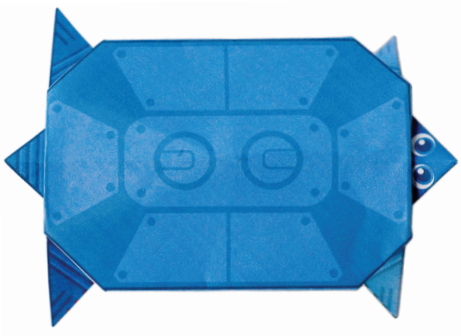


13. Using the dotted line (shown above) as a guide, fold the entire turtle in half and unfold.



14. Turn the turtle over so that it can stand on its feet.





Your turtle is finished!
