

Frames Instructions

Your refrigerator or desk will be terroriffic with these fun-to-make printable frames. Below you'll find two options for this project. Option 1 requires purchasing Magnet Sheet Paper for ink jet printers. Option 2 can be done using household items.

Option 1:

Materials:
Magnet Sheet Paper for Ink Jet Printers
Utility Knife or Scissors
Ruler

Step 1: Print

Load the magnet paper following printer instructions. (Handle paper by the edges to avoid fingerprints.) Print **Frame Template** using your ink jet printer on the glossy surface (imaging side) of the paper. (For best results, load only one sheet at a time.)

Tips & Tricks:

- To select the proper print settings in Adobe Acrobat, click Print; in the print dialog box, select Properties; choose the appropriate paper type and then select the highest print quality.
- We recommend that you run a test print on regular paper to double check that you're printing on the correct side of the paper. (If problems occur, check your printer manual for additional printing instructions.)

Step 2: Dry

Let paper dry several minutes before handling.

Step 3: Cut

Cut along the dotted lines. (For best results, use a sharp knife with a ruler as a guide.)

Step 4: Decorate!

Place the magnets onto your refrigerator or any other metallic surface. (WARNING: Avoid placing magnets on electronic devices such as televisions and DVD players. Magnets can interfere with or damage these types of devices.)

Option 2:

Materials:
Construction Paper
Printer Paper
Scissors
Pencil or Pen
Glue

Step 1: Print

Load paper following printer instructions. (Handle paper by the edges to avoid fingerprints.) Print **Frame Template** using your ink jet printer. (For best results, load only one sheet at a time.)

Step 2: Dry

Let paper dry several minutes before handling.

Step 3: Cut

Cut along the dotted lines.

Step 4: Trace

Using the outside of the frame as a guide, trace onto construction paper.

Step 5: Cut

Cut the construction paper following the lines. This will be used as backing for the frame. Once you've selected a photo to display in your frame, place the construction paper piece behind the photo and glue to the frame.

Step 6: Cut Pattern Piece

Cut out the pattern piece labeled frame stand.

Step 7: Trace Frame Stand

Trace the pattern piece onto construction paper.

Step 8: Cut

Using scissors, cut out the traced pattern on the construction paper. This will be used as the frame stand.

Step 9: Adhere Stand to Frame

Glue the frame stand to the back of the frame. Place the finished product on any countertop, desk, or stand.
