1. Print out all pages of the Create-a-Monster printable. Your monster can be a mummy, skeleton, vampire, Frankenstein's monster, or you can mix up the pieces of all the monsters to create a strange and unique monster. All body parts are represented for the mummy, skeleton, and Frankenstein's monster, while the pump hat monster. Start by thinking of what kind of monster you would like to create. Once you have an idea, cut out the appropriate pieces for your monster.
2. Once you have all the pieces cut out that you would like to use to make your monster, lay them out in the appropriate positions on a flat surface.

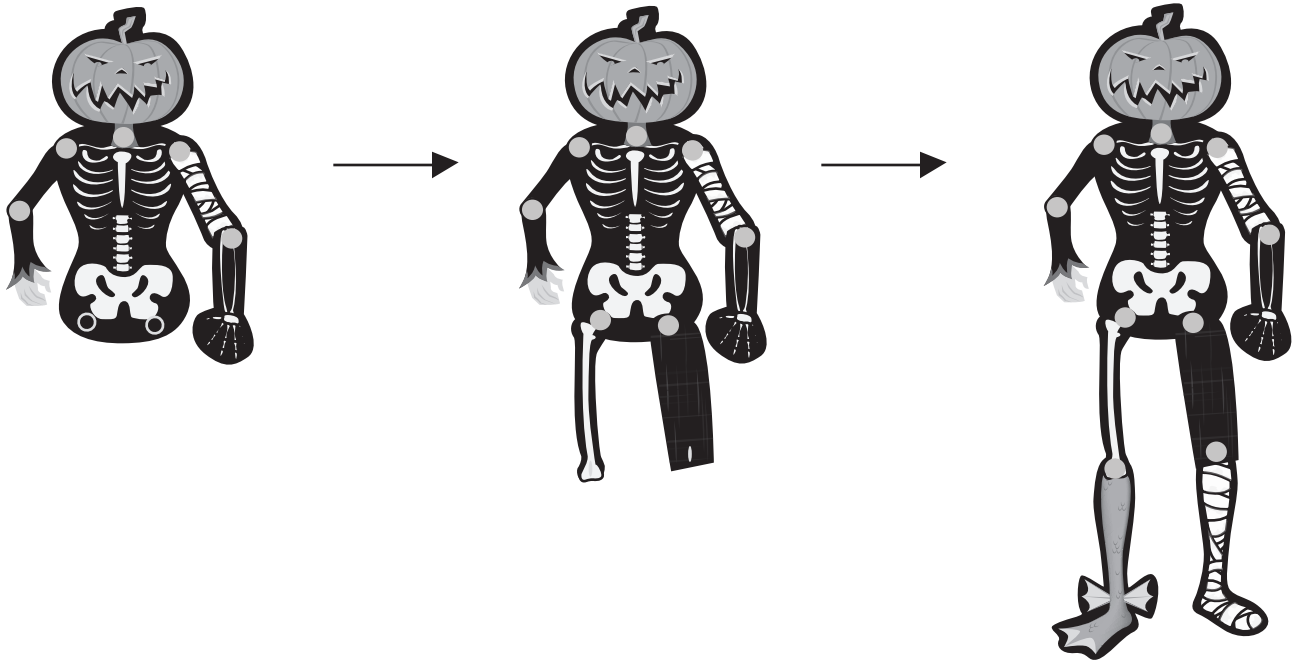

3. First, attach the head to the body by placing the yellow oval that appears on the neck, on top of the circle that appears at the top of the torso piece. Insert a brad through the oval and through the circle. Butterfly the ends of the brad on the back side of the torso.

4. Next, take the right upper arm and place its yellow oval on top of the circle that appears on the left side of the torso. Insert the brad through the oval and the circle, and then butterfly the brad behind the torso. Repeat this step with the upper left arm.

5. Repeat these steps with the other limbs until your monster is complete.

6. Punch a hole at the top of your monster's head and insert a string so you can hang your monster where it can frighten people!
