

Print place cards on card stock or regular paper. Fold the paper in half at the dotted line. Cut along the edges of the pumpkin. The place cards should remain connected at the top of the stem. Making sure both sides of the pumpkin are folded together, punch a hole near the stem.

Cut a green pipe cleaner down to six and a half inches. Using a pencil, curl two inches of the pipe cleaner, then insert the other end of the pipe cleaner halfway through the hole in the place card (A). Once inserted, curl the other end of the pipe cleaner (B). Bend the pipe cleaner so that both sides of the vine overlap (C).
